Summary

MERN Stack Developer with 1+ years of experience building scalable and responsive web applications. Delivered 3+ production projects that improved performance and user engagement by up to 20%, while reducing page load time by 15%. Proficient in React, Node.js, MongoDB, and REST API integration, with expertise in Front-end and cross-browser compatibility. Skilled at designing intuitive UIs, optimizing performance, and collaborating across teams to deliver business focused solutions within tight deadlines.

Work History

Virtual Globe Technology

August 2024 – present

Software Developer Engineer

Nagpur, Maharashtra

- Engineered reusable components in React and Next using Radix UI, shadcn-ui, improving UI consistency and responsiveness.
- Collaborated in an Agile environment, participating in code reviews, sprint planning, and daily standups to align with cross-functional teams.
- Developed interactive dashboards by integrating REST APIs for dynamic user activity and transaction data, boosting reporting accuracy by 35%.
- Performed debugging, optimization, and cross-browser validation to enhance reliability.

Projects

Decyde

React, Tailwind CSS, Vite

Project Link

- Designed and implemented vendor and customer dashboards, serving 100+ users during testing.
- Developed vendor features for shop, product, and coupon management with payment gateway integration, enabling 50+ transactions.
- Designed responsive UI with TailwindCSS and 20+ reusable components, improving development speed by 30%.
- Enabled real-time chat functionality, boosting vendor-customer engagement by 40%.
- Conducted bug fixing, validation checks, and usability testing to ensure reliability.

TenderWIN

Next.js, React, Tailwind CSS, Shadcn UI, Radix UI

Project Link

- Built a responsive front-end React + Next.js frontend for displaying tenders across 25+ states and organizations.
- Orchestrated REST APIs for real-time tender listings and updates.
- Implemented advanced search and filters, boosting discoverability by 40%.
- Streamlined Redux Toolkit for state management, resulting in a 40% reduction in API calls, which boost performance.
- Standardized UI design with TailwindCSS, Radix UI, and shadcn/ui, boosting accessibility by 30%.

Real-time Chat Application Using Mern Stack

React.js, WebSocket, MongoDB

Project Link

- Developed a responsive and interactive UI using React.js, enhancing user experience across devices and reducing bounce rate by 30%.
- Engineered authentication and chat components with JWT, Express.js, and MongoDB, securely managing user data for 50+ active users and ensuring fast message retrieval.
- Integrated Socket.io for real-time, bidirectional communication, enabling instant messaging with 100ms latency across multiple chat rooms.
